

Electronic

Series circuit

wire is in a continuous loop.

Parallel circuits

Wires are parallel and can split off.

Ohms Law shows that current is directly proportional to the voltage this could be shown as $I \propto V$.
It also shows that voltage is indirectly proportional to it's resistance. this could be shown as $V \propto 1/R$.

$$P = \frac{E}{t}$$

Power is measured in Watts (W)

energy is measured in Joules (J)

time is measured in seconds (s)

Examples where there are electronics:

Computer

mobiles

toaster
