1.Introduction

In this work I will talk about the impact of virtual learning environment in a way that helps us today in order to make it easier to obtain information faster than in the past because the resource they used does not compare with the one we use today and in the future we will do better and more. I will also talk about the advantages and disadvantages of e-learning and I will also draw up a graph on e-learning where I will ask my colleagues what they think about e-learning and show the results and give my opinion summarizing in the responses of my colleagues , what should improve or not that should not improve.

The impact of virtual learning environment

Virtual learning environment is a website that helps us to collect all the information we need more quickly than in the past because methods from that time were highly different and are not even compared to today. To access this website we simply need a pc or even a cell phone while in the past it was through newspapers, books, articles even though sometimes the information was found some information was already out of date. The purpose of the virtual learning environment is to help us, when I say help I am referring in an educational way, for example between teachers and students we can now watch our lessons online, we can get any kind of information quickly, it also helps us to communicate between us, we also don't need to leave home with this new technology we can attend online classes and we can collect all the requirements we need. Normally anyone can use this website as I mentioned above the virtual learning environment that helps us get any kind of information quickly and at the same time it also teaches us a lot and helps us to interact with what is around us and around out.

2.Background

We can start by saying that it gave us this generation or even when times of changes that technologies started to appear in our lives that we are lucky, I say that because nowadays it is much easier to obtain information compared to hard and that it was more difficult to obtain information and it took longer if a lot to find, when I speak it took a while to find information I mean in the sense it can take hours, days, months or even years, because in those times when there was no technology to obtain information it was very scarce and there were moments at that time many people he knew what was going on around him. At the time, there was no technology for people to obtain information, it was based on books, articles, magazines and newspapers and even in the case of newspapers there was already some outdated

The Impact of Virtual Learning Environment

1909626

information, that is, what was written was not done today and I had quoted it above. getting information that was very complicated and scarce and we can consider at that time there was competition because everyone wanted to know that it was happening around you or in your world. Even today we can consider that some people are not used to new technologies and prefer to keep with their old ones

habits like reading a newspaper or even reading a book, but now with the new methods that technology allows us, it is much easier to access this information simply and just put the title of the book or even the newspaper and get all the information we need. Now we can see with the new methods of technology, the messages or information that we receive comes with more quality. I say that because, in the past, there were no number of people like today, for example, currently a document when it is being written has to be analyzed by several people. before being published taking into account the punctuation, spelling and language features. But it is not only in the qualities that there have been changes that we can consider that terms of quantity have made great progress also because now we have more requirements to obtain information with the help of new technologies such as cell phones, computers and others and not forgetting the old methods. In everything that has been mentioned we can not forget that in these types of methods we have advantage and disadvantage. Starting with the advantages, we can obtain any information at any time and in any place, just having the internet or even having wi-fi in our furniture or computers in order to make it easier for us to obtain information. For example, as I mentioned above, there is great competition in the sense that you have a newspaper when you are going to work or something else, but there were times when it ended and I did not have other resources to access it, but now with new technology even though finish the newspaper, nowadays as long as you know the title of the newspaper is more practical for us because we can easily access news and perhaps with better quality than in the newspaper and therefore we can consider it an advantage. Another example in the past to know if the student is attending class or at school we had to go to the book where he keeps all the names and we had to call one by one there was a moment that stole a little time from the class but now we use a new system a simple card that gives them all the information whether we are in school or not or even in class. But in the midst of all this, we must also remember that not everyone has access to new methods of technology or does not understand how to use them, and this can be considered a disadvantage. When I refer to a disadvantage I mean people of a certain age who are not used to new technologies and even want to understand it will be a little

I will no longer have the one that ration or even the patience we have in young people. As we know, technology also has its disadvantages for example in the case that I mentioned above people of a certain age do not know or are not used to new technologies, and another example there are times when we are unable to access

The Impact of Virtual Learning Environment

1909626

the internet because the location is not favorable and it's kind of complicated to enjoy.

3.Aims and objectives

With E-learning another method that serves to help learning in an easy and even easy way to access, with this type of website and a way to help students in the sense that when they are unable to attend class they can go over what was given in class or you can even clear up your doubts with the teacher or colleagues because it is also a communicative program that you can interact with people as per the Microsoft team and the means that we use at that moment to attend classes online.

4.Method

Template of my survey

Questions	Yes	No
1.Do you think moodle to change something?		
2.Does the page meet your expectations?(Moodle)		
3.Would you consider yourself a frequent user?		
4.Were able to find the information you were looking for on the website?(Moodle)		
5.Are you able to access all learning material?		
6.Are you able to submit your assignment without any problems?		
7.Are you able to interact with your teachers through the page?		

Question	Very easy	Moderate	Difficult	Very difficult
----------	-----------	----------	-----------	----------------

The Impact of Virtual Learning Environment

1909626

8.how easy is it to navigate the web?				
---------------------------------------	--	--	--	--

Question	1-2 times	3-4 times	More than 5 times
9.how many times per week do you use the service?(Moodle)			

Question	During the day	At night	Anytime of the day
10.What time of day do you tend to access the service?			

Questions	Extremely Poor	Extremely good
11. Did you find the information valuable?(Moodle)		
12.In your do teachers use it efficiently?		
13.Do you think the moodle is helpful?		

Question	Most of time	Sometimes	Never
14.Do you usually encounter any technical erron on the page? (Moodle)			

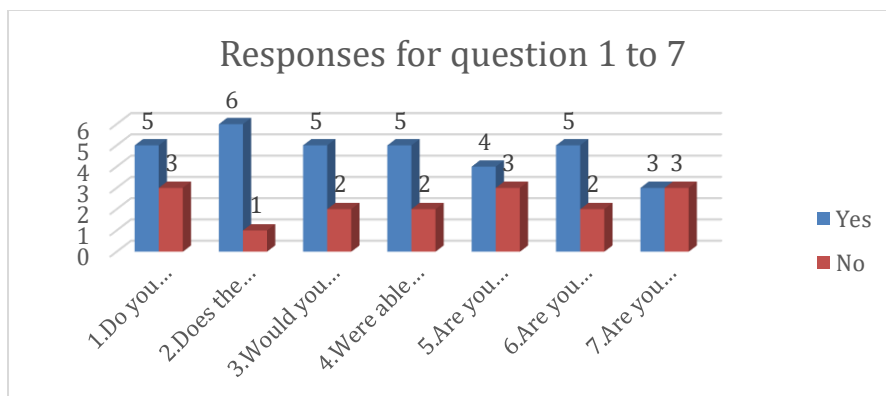

Question	1*Year	2*Year	3*Year
15.Which year are you on?			

The Impact of Virtual Learning Environment

1909626

5.Results

Questions	Yes	No
1.Do you think moodle to change something?	5	3
2.Does the page meet your expectations?(Moodle)	6	1
3.Would you consider yourself a frequent user?	5	2
4.Were able to find the information you were looking for on the website?(Moodle)	5	2
5.Are you able to access all learning material?	4	3
6.Are you able to submit your assignment without any problems?	5	2
7.Are you able to interact with your teachers through the page?	3	3

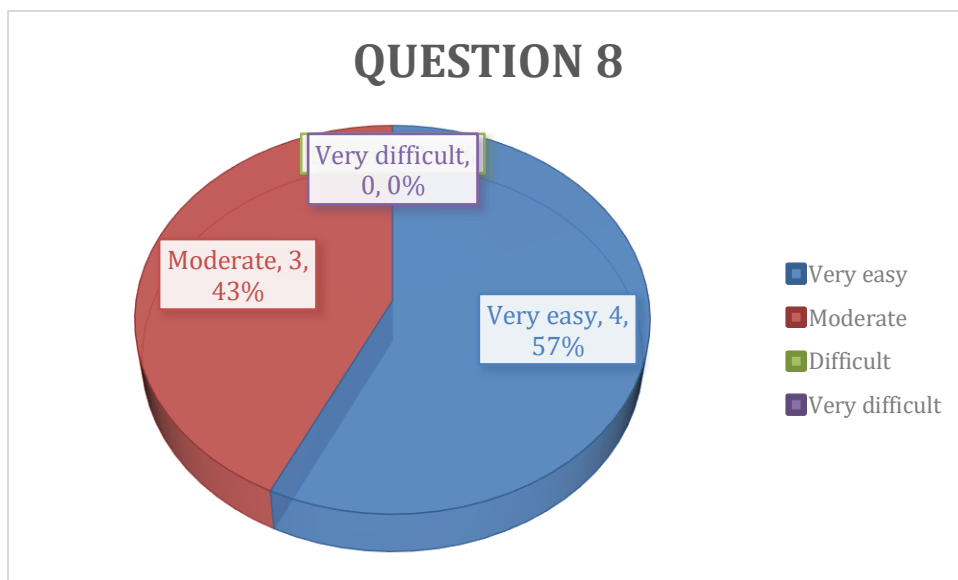

The Impact of Virtual Learning Environment

1909626

Well as we can see there is not much difference in the results are almost the same, just in the issue number 2 there is a big difference.

Question	Very easy	Moderate	Difficult	Very difficult
8.how easy is it to navigate the web?				

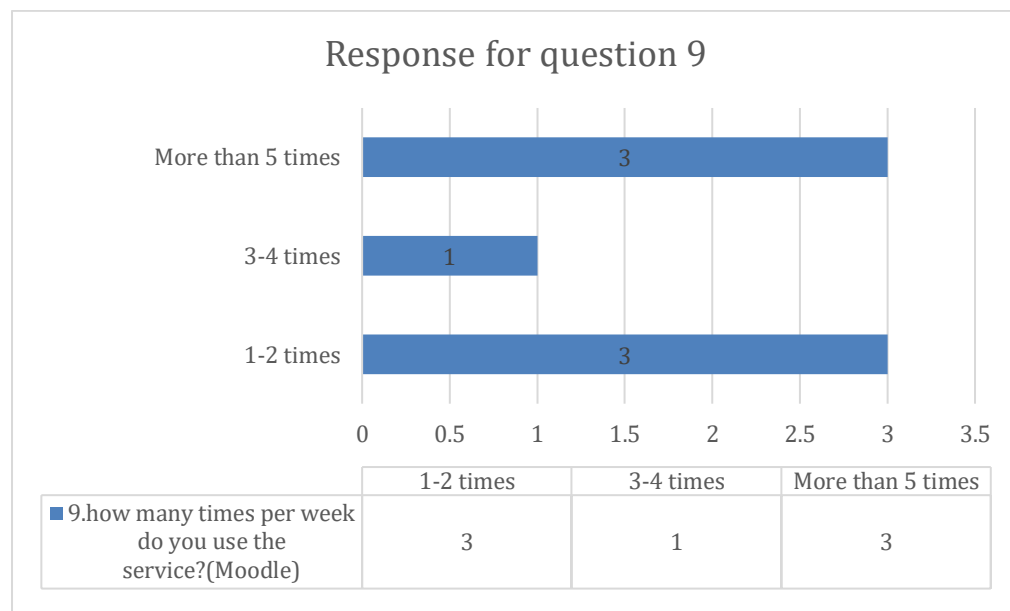

Here we can also see that there is not a big difference if we talk about percentage, we can see that the only difference is 14% between moderate to very easy ratio.

Question	1-2 times	3-4 times	More than 5 times
9.how many times per week do you use the service?(Moodle)	3	1	3

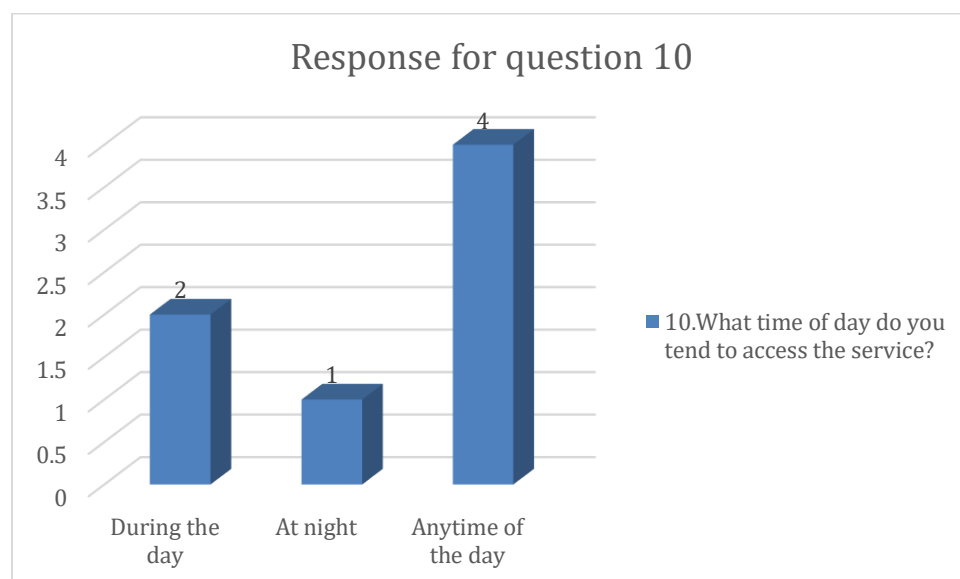

The Impact of Virtual Learning Environment

1909626

Well as we can see an equality between 1-2 and more than 5 teams I can consider that a positive result shows us that moodle is very helpful.

Question	During the day	At night	Anytime of the day
10.What time of day do you tend to access the service?	2	1	4

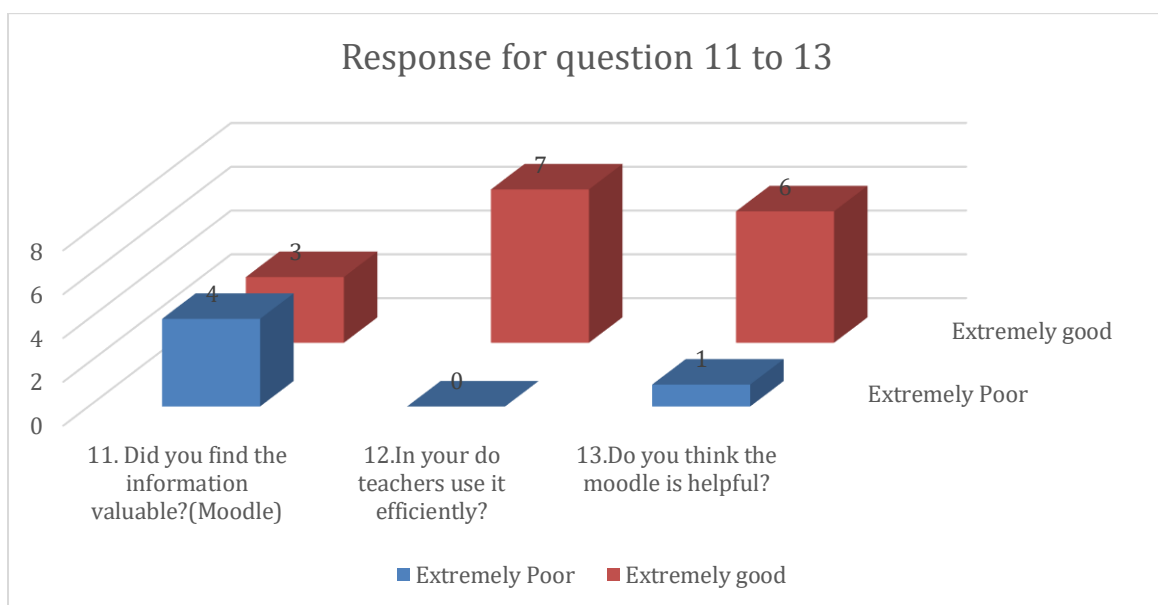

We may see 4 people like to have access to the service anytime of the day and I think this is particularly good despite some not being of the same opinion.

The Impact of Virtual Learning Environment

1909626

Questions	Extremely Poor	Extremely good
11. Did you find the information valuable?(Moodle)	4	3
12.In your do teachers use it efficiently?	0	7
13.Do you think the moodle is helpful?	1	6

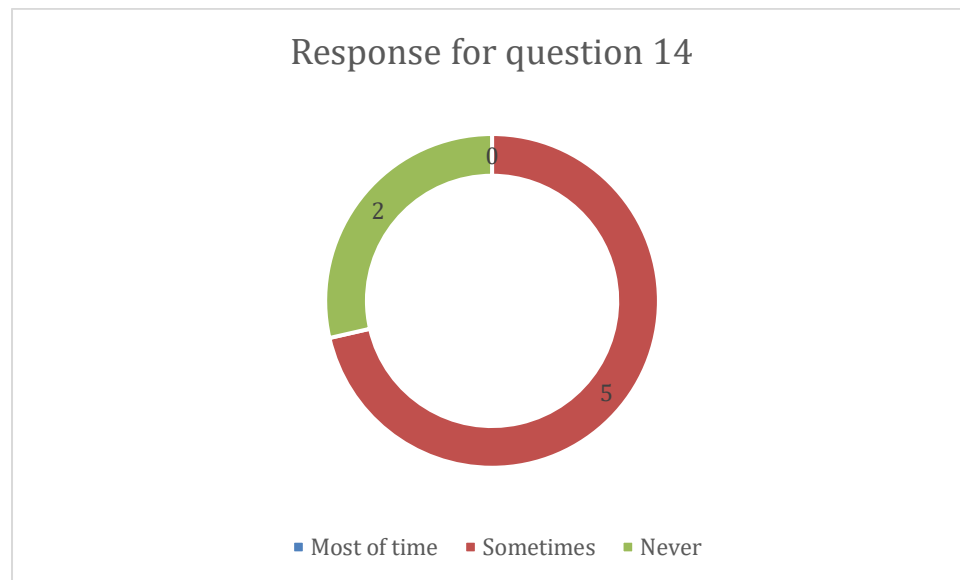

Well with this result we can see the average and reasonable by the survey of my colleagues.

Question	Most of time	Sometimes	Never
14.Do you usually encounter any technical error on the page? (Moodle)	0	5	2

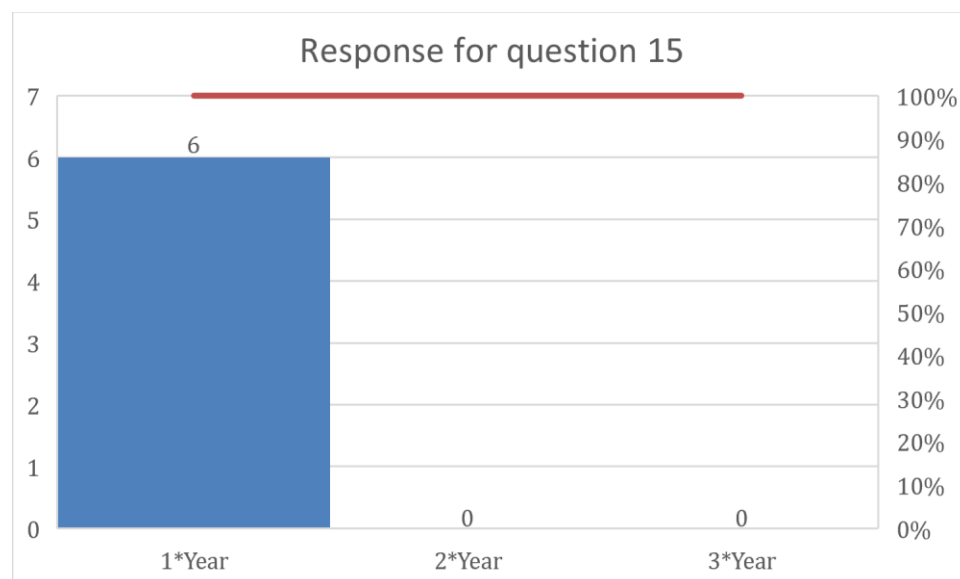

The Impact of Virtual Learning Environment

1909626

. As we can see most of my colleagues at times the technical error.

Question	1*Year	2*Year	3*Year
15.Which year are you on?	6	0	0

As we can see all my colleagues are in their first year of university.

6.Discussion

In my opinion about surveys that I received in general, for what my colleagues responded to me in the opinion, the results were positive and for the responses I received were all to my liking, and to be honest these were the results I expected.

The Impact of Virtual Learning Environment

1909626

7. Conclusion

this project that I developed I learned more about E-Learning, I also learned about the methods they used in their backgrounds and also a new experience for me that Excel had never used, but with this project you can understand using this program.
