

Case Study – Risks and Ethical Considerations

By Donna Walters
SJSI5022

Case study

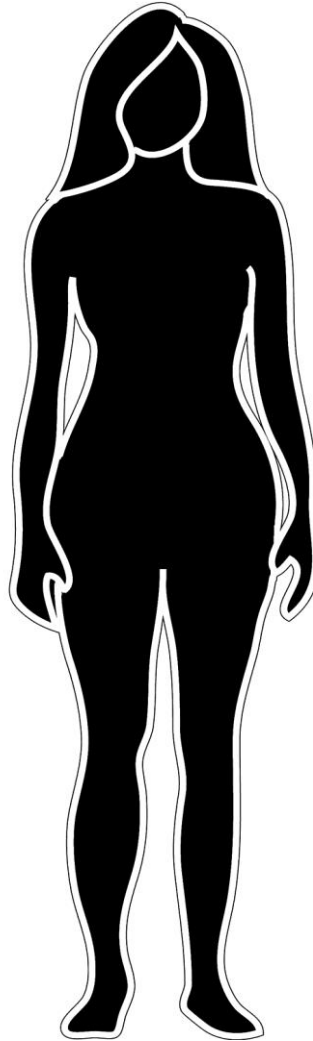

Biological

- Visually Impaired
- Renal Failure
- Diabetes
- ? Familial influence / genetics

Sociological

- Breakdown in family dynamics
- Homelessness
- Anti Social Behaviour
- Inappropriate relationships – financial / sexual exploitation
- Self care – medication / support groups
- Risk of harm to herself and others - physical / verbal altercations.
- Improper sharing of information / recording of it.

Ms.A

Psychological

- Emotionally unstable personality disorder
- Depression
- Anxiety
- Trauma
- Sense of self
- Self harm and suicidal ideation
- Unstable relationships
- Impulsive behaviour / anger
- Intense emotions / feelings
- Manipulative behaviour

The biopsychosocial model of health

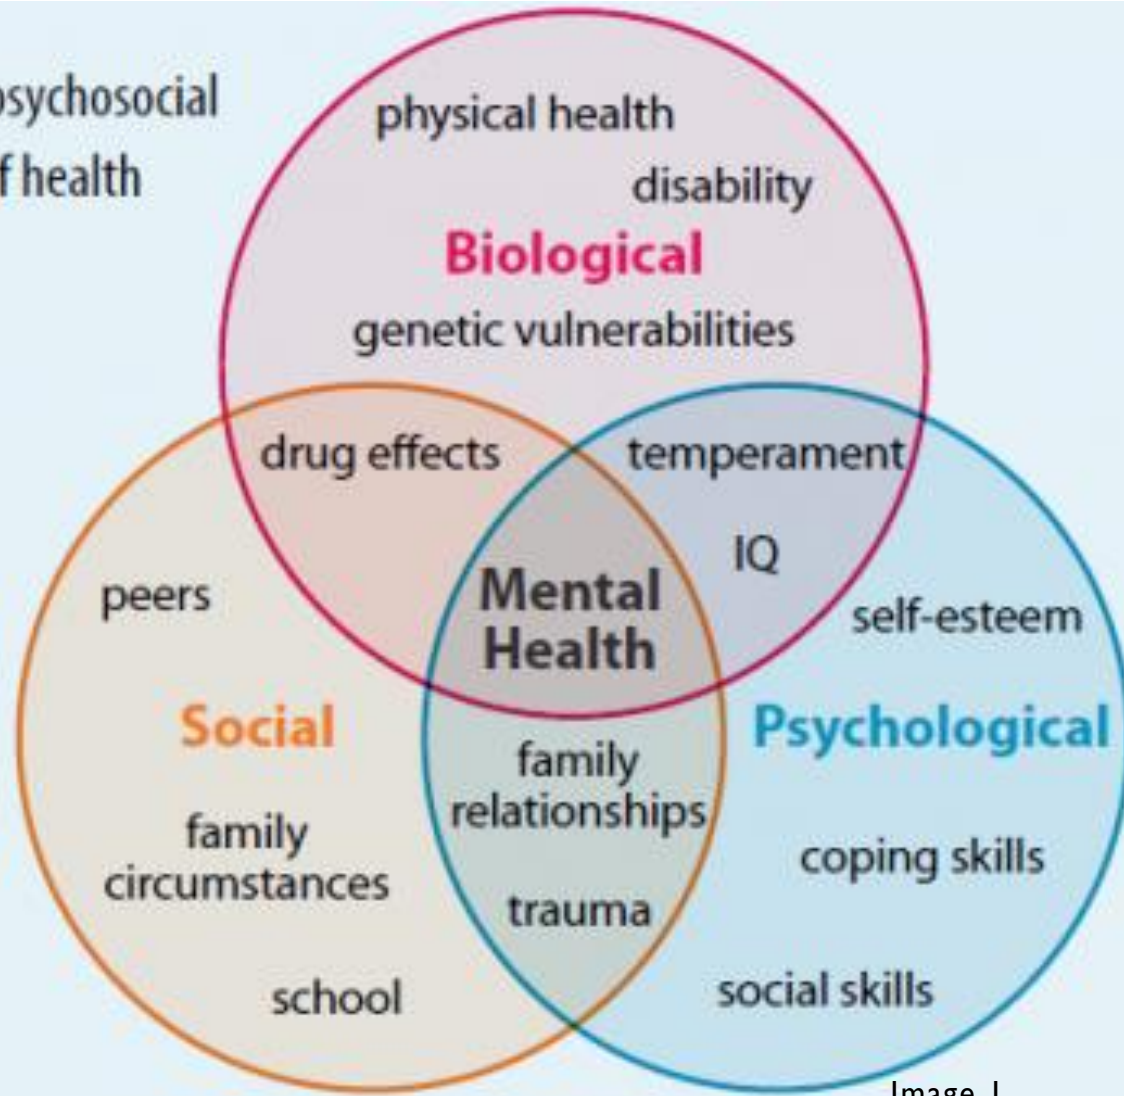

Image 1

BIOPSYCHOSOCIAL MODEL

(Havelka et al., 2009; Borrell-Carrio et al., 2004).

Inconsistencies in case study

- Nothing dated
- Unclear housing information
- Insufficient documentation of referrals
- No clear details of multi agency involvement
- Unclear family circumstances (background)
- Unclear assessment details
- Limited medical history
- Why were CAMHS involved?

Ethical Considerations

The right to take
risks

Consent

Sharing information
appropriately

Respecting the right
to self determination

(BASW, 2012; Banks, 2012; Schildmann et al., 2017).

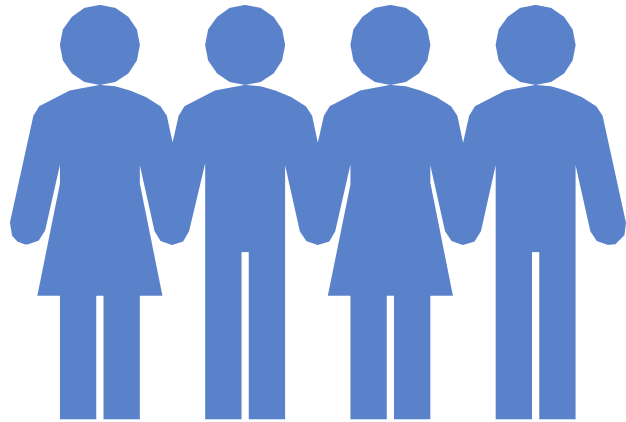

Image 2

Conflict of Interest

Capacity is:

‘the ability of a person to make decisions that may have legal consequences for themselves and/or for others affected by the decision’.

(Thistlethwaite and Jackson, 2014; DLS, 2009).

Multi Disciplinary Working

- Social Services
- Police
- Mental health services
- Family
- Health profession
- Housing department
- Occupational Therapy
- Ms A

(SCIE, n.d.)

Ways to Overcome

Multi disciplinary
approach from outset

Improved understanding
of Ms A's
Biopsychosocial needs
by all those involved

Working in partnership

Led by a lead
practitioner enabling the
whole team to see the
bigger picture

Developing a joint plan
agreed by all

Appropriate information
sharing according to
protocols

Person centred
approach

(Schildmann et al., 2017).

CONCLUSION
