Agnes Akyeampong- 2512943

Bernice Gyedu - 2439738

Mohammed Miah – 2443174

Lecture name – Hajra Mustasim

MS TEAMS 365 COMMUNICATION (MS TEAMS)

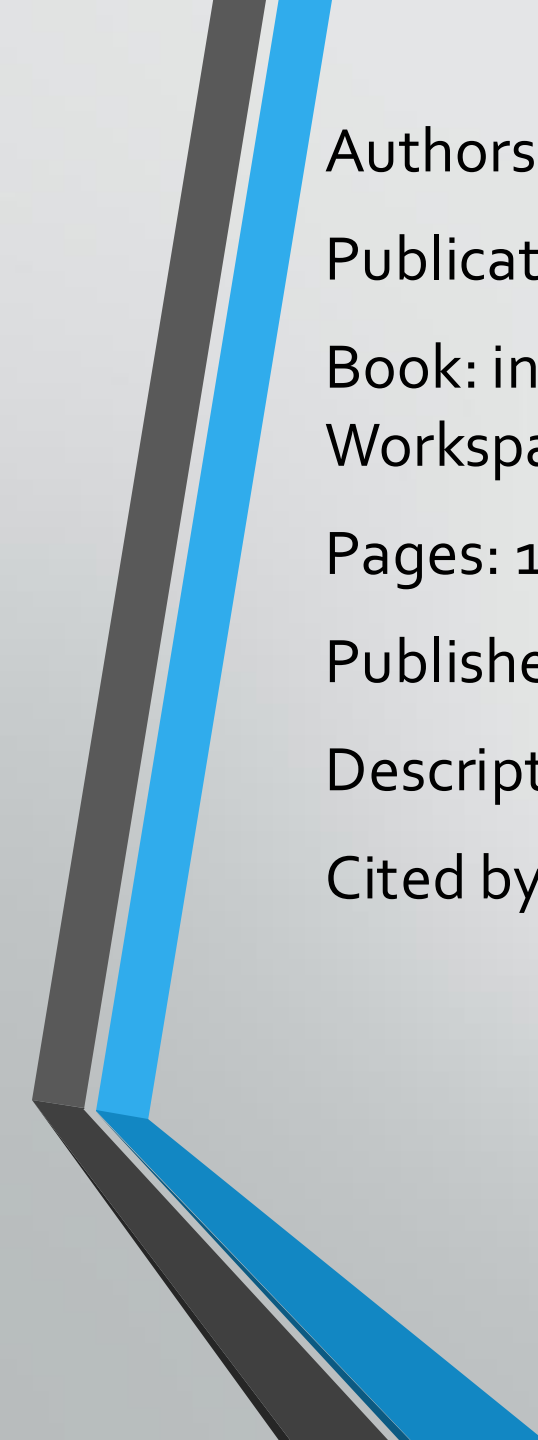

Teams is useful for meetings to be held remotely. It is a communication platform designed to contain various tools and services in a single workplace. It is used in schools, businesses and even churches. It's a way of communication as this app promotes formal, creative meetings or chats with people that you can connect to through their email. Which is superior as it is a separate way other than other apps like WhatsApp to talk about work, school overall serious work.

SUNRISE RESIDENTIAL HOMES

For sunrise residential homes, it would allow the staff to organise virtual calls and showcase special events at the residential homes to the family and friends. Additionally, it helps to send messages across and discuss the work at the sunrise residential home. It is very easy and essential in communication. You can have conference meetings to discuss how things can be effective at the residential home. It saves more time than meeting in person.

LIMITATIONS(MS TEAMS)

Ultimately, the limitations of Ms teams is the network. It can be broken and sometimes the internet can be slow. The connectivity can be a problem, especially if the meeting requires a lot of people, and only people that have access can join (limited amount of people).There will be a lack of confidentiality of topics spoken in the meeting if the attendees is in a place with other people who can cause distractions.
