

Yo! I just heard a few of your beats from your SoundCloud page and they sounded really good. I am looking for a producer to work on a few trap beats with and I was wondering if you would be up for a collab? Or if you already have a couple of pre made beats I'd be happy to give them a listen and potentially work with that instead. Cheers bro!

Hey man! Glad to hear and thank you for reaching out! I am defo up to try writing something together. I have a few beats already, but they are not completely finished atm. If you want, we can arrange a call at some point this week and I can show you what I've got and we'll see where to go from there :)
