- Create and Safeguards passwords

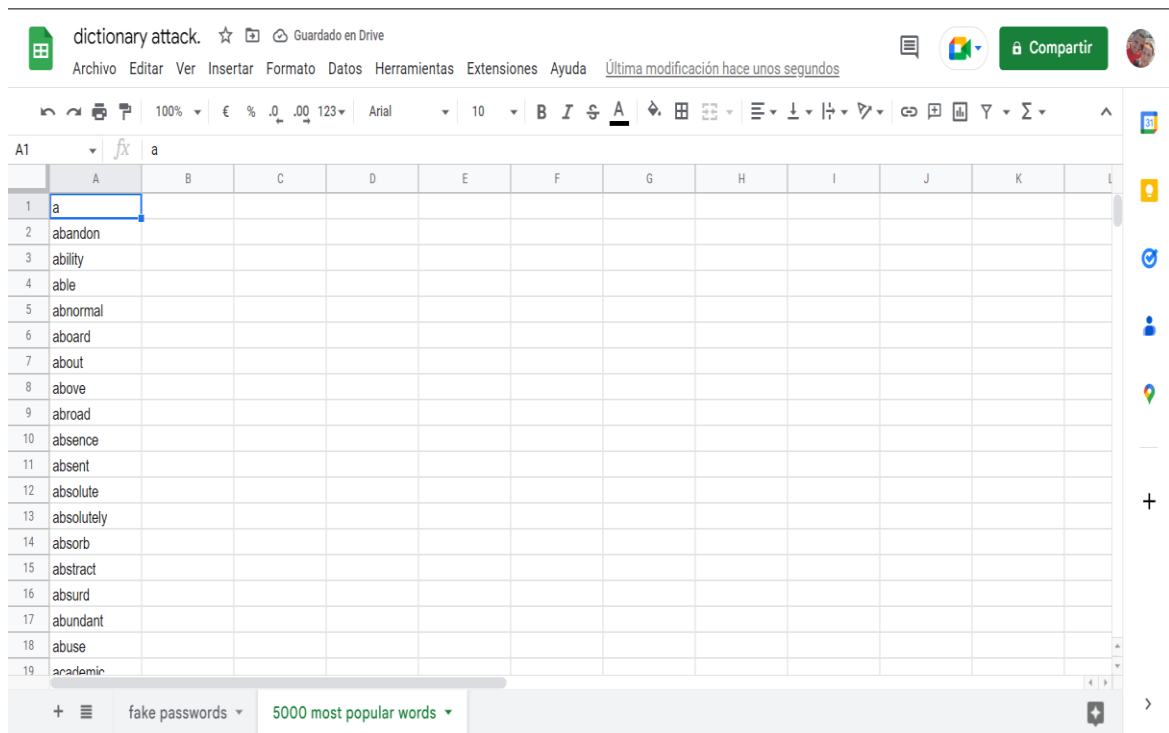

Today I try to explain how to get a safe password but first I will show you how vulnerable are some password, used dictionary attack.

First, in Google drive we open a new spreadsheet with name “dictionary attack”. Rename sheet 1 with the name fake password and create a column called PASSWORDS now just type ten pretend fake passwords minimum 8 characters.

Second, we used a BRUTE FORCE ATTACK is a trial-and-error way for obtain passwords. So, add a new sheet to you dictionary attack spreadsheet, rename the sheet two with name “5000 words most popular” open it and copy and paste 5000 words most popular list.

Third, use the concatenate functions to vary the

+ fake passwords 5000 most popular words Explor

Fourth, use find and replace tool to search for each password, search in 5000 words most popular sheet, insert checklist box next to your passwords in the end check the boxes for each password.

The screenshot shows a Google Sheets spreadsheet titled "dictionary attack." with the following data:

	A	B	C	D	E	F	G	H	I	J	K	L
1	passwords											
2	romero82	☐										
3	cadiz1982	☐										
4	andalucia123	☐

19												

The spreadsheet interface includes a menu bar with options like Archivo, Editar, Ver, Insertar, Formato, Datos, Herramientas, Extensiones, and Ayuda. The bottom status bar shows the active sheet as "fake passwords" and the selected range as "5000 most popular words".

The main point of all this is show you how vulnerable is used personal details in our password and what we can do for keep safe the passwords: 8 characters (mixes uppercase and lowercase letter with symbols and numbers, never writing your password in paper, change regular your password and do not used personal details is better used favourite song, movie, or place.

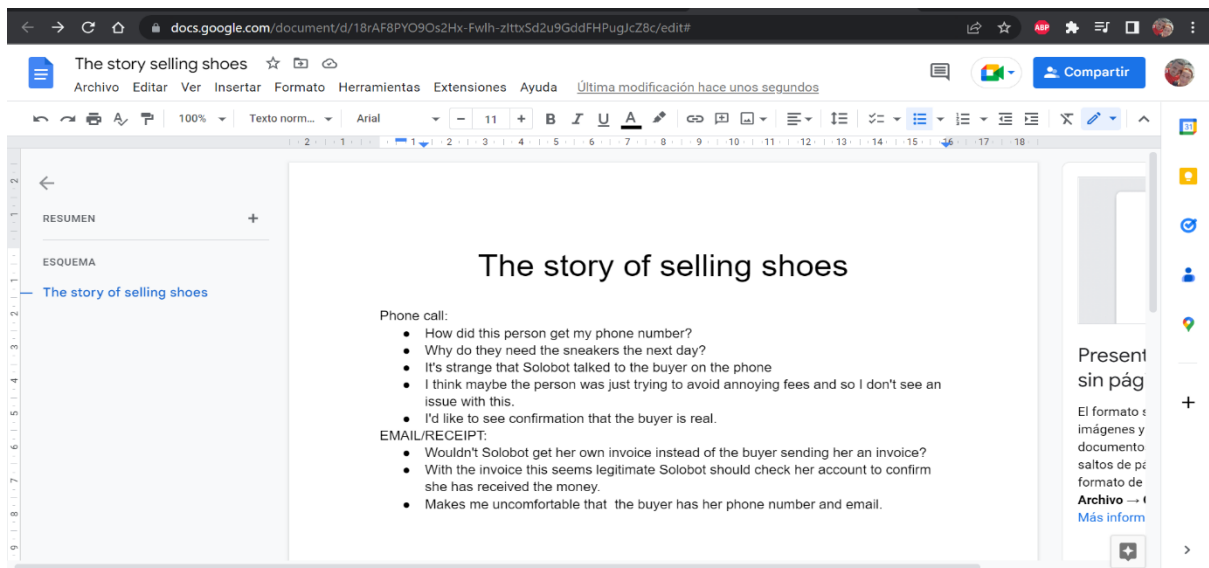

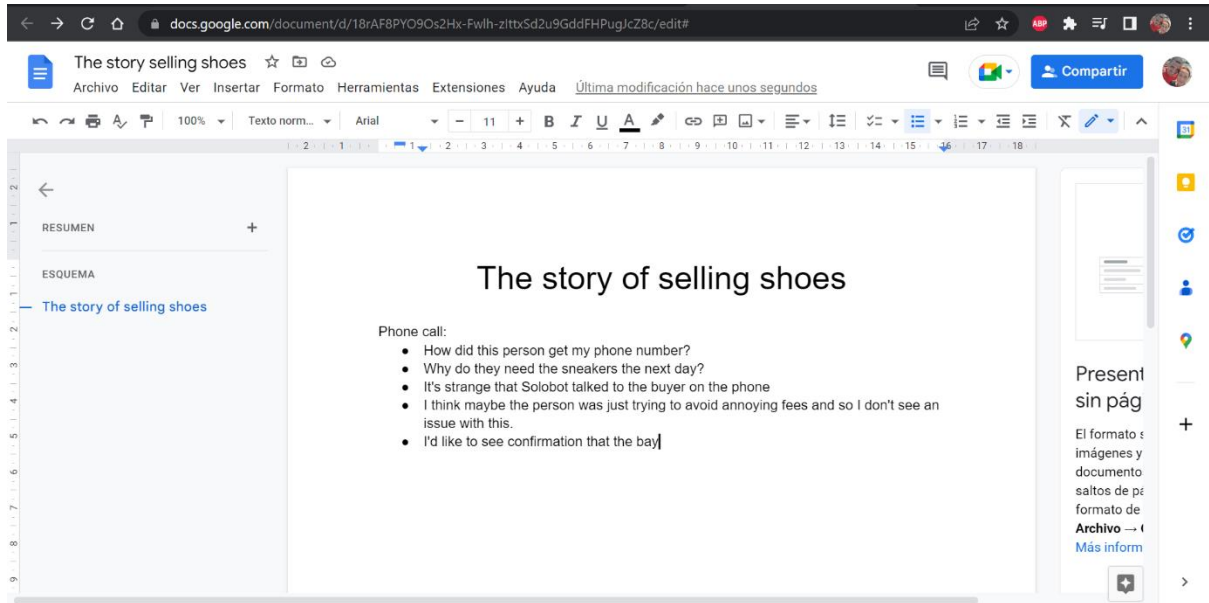

- CONNECT AND COLABORATE FROM ANYWHERE WITH DIGITAL TOOL.

I'll use the option of sending a direct message using Google Chat because I think it's the more easy way for contact with someone in a professional way

- AVOID ONLINE SCAMS

Avoid online scams and know how to detect is very important for have safe your details, finances, ... next a few steps for detecting scams.

RESUMEN

ESQUEMA

The story of selling shoes

The story of selling shoes

PHONE CALL:

- How did this person get my phone number?
- Why do they need the sneakers the next day?
- It's strange that Solobot talked to the buyer on the phone
- I think maybe the person was just trying to avoid annoying fees and so I don't see an issue with this
- I'd like to see confirmation that the buyer is real.

EMAIL/RECEIPT:

- Wouldn't Solobot get her own invoice instead of the buyer sending her an invoice?
- With the invoice this seems legitimate Solobot should check her account to confirm she has received the money.
- Makes me uncomfortable that the buyer has her phone number and email.

SHOULD SOLOBOT BUY THE SHOES?

- Solobot should not ship the shoes.
- * Getting a phone call from someone online is weird and makes me uncomfortable.
- * The email address doesn't look real.
- Solobot only ship in official website

What did Solobot have to do?

Solobot need to canceled the shopping the seller is not secure

Presentamos el formato sin páginas

El formato sin páginas te permite añadir imágenes y tablas anchas, así como ver documentos sin la interrupción de saltos de página. Puedes cambiar el formato de cualquier documento en [Archivo](#) → [Configuración de página](#). [Más información](#)
