

Data Collection Study

Thank you for agreeing to take part in
this study.

Part One

You will now be shown 12 images of
black and white faces for 2 seconds each.

Please remain silent during this phase of
the study.

1

Thank you. Part One is now complete.

Part Two

You will now be shown 6 pages of images containing 6 faces per page.

Please write down the **numbers** associated with the faces you have already seen in Part One.

Some pages will contain no faces you have previously seen, some may contain one, some may contain two, and so on.

Please remain silent throughout this phase of the study.

Thank you. The study has now finished.

Please place your completed response sheets facing down on your table to be collected.

Debrief information

Thank you for taking part in this study.

The main aim of this study was to explore whether people are better able to recall and identify faces that belong to the same ethnicity as them – their 'in-group'. We specifically hypothesised that participants would be able to recall significantly more faces that belonged to their in-group than their out-group.

If you wish to withdraw your data from the study you must tell the researcher now. After this point, all of your data will remain confidential and we will not trace it back to you.
