learning in the digital era

name: Eszti Fulop

student number: 2201085

course: photography in the arts

module: ADAA400

word count: 329

As I began planning for my video I had to consider where I would like to film my video. After writing some locations down I then come up with filming my film close to home because that where I start the process of finding who I want to be as an artist. I then decided before I start filming, I would walk around my local area to see where I could film some shots in order to get the best quality. As I was filming different angles of myself walking through the forest.

I then come up with the idea of talking photos of the different tress and bridges around me to add into the film because it will show my journey on how I have changed as artis from the last time I had been there. I then began the process of editing my video I then chose to edit

my videos and pictures into black and white because it made the quality of my film better. I did find the process of what to say in my video difficult. I overcome this by continuing rewrite what I was saying until I was happy with what I was going to talk about.

I then began the process of making my film by using premier pro. As I was choosing my selections of videos to go into my film, I then started off by looking at all the videos I had taken and witch one would go well with each other. As I was looking into organising where my videos would go, I then had to choose which photos I would go into my film between different videos. I did this so my film would look different I have selections of different points of my journey through the forest. Overall, I am happy with the outcome of my film because it shows the creativity that went in to making the video by having good quality of videos and pictures.
