Questionnaire:

Questionnaire

10 March 2022 22:03

Questionnaire questions and results from 4 respondents

Q1: What do you think of my project idea? (Approve/Disapprove).

- Approve – 100%.
- Disapprove – 0%.

Q2: What would you look for in a snooker scoring application?

- "players scores to be kept digitally".
- "Scores to be kept within an on-going game."
- "Each ball to be given their correct points. I would expect a foul system. To be able to rematch the opponent and end the game at any point."
- "Scores to be kept track of, statistics and ease of use".

Q3: Which mobile operating system would you prefer the application to be implemented on?

- Android – 100%.
- iOS – 25%.

Q4: Would you rather the application to be jam-packed with features or simplistic?

- Very simplistic – 25%.
- Somewhat simplistic – 25%.
- Middle ground between simplistic and jam-packed – 25%.
- Jam-packed – 25%.
- Very jam-packed – 0%.

Q5: Do you have any further comments?

- "I prefer very simplistic applications because they are easy to use and not overly complicated".
- "I don't approve or disapprove of your project however because I had to choose from an option I chose approve. But there should be a third option saying neither approve or disapprove".
- "Your use of the word "jam-packed" is informal, I think a word like "cramped" would be more professional".
- "From what I have read, this looks like a good project idea. But I did expect more questions."

FINAL GRADE

GENERAL COMMENTS

96/100

Instructor

Total:	96
1. Engagement with Literature Skills	
T1 Mind Map: + Good use of citations and references included. Some additional high quality sources could be used. T2 Aim & Objs, Res. Phil., Dbs & search strats: + Good use of citations and relevant references included. T3 Res. strats: + Good use of citations and references included.	18
2. Knowledge and Understanding Skills	
T1: + Good coverage of relevant concepts/topics, supported by citations. T2: + An appropriate research philosophy is defined and documented for the project. T3: + Relevant research strategies for data collection are selected and documented.	20
3. Cognitive and Intellectual Skills	
T1: + Evidence of relevant concept and project idea analysis is documented. T2: + As a result of due consideration and analysis, a single Aim and several Objectives have been documented. Good. – Aim could include an element of research/investigation and analysis. T3: + Relevant strategies to enhance validity, reliability, and generalisability are documented.	20
4. Practical Application Skills	
T1: + Good use of software to create	18

the Mind-map. T2: + Appropriate databases identified and search strategies used to identify relevant research related to the project area. Some additional search strategies and search tools/Dbs could be tested and documented. T3: + Data collection method designed and used to acquire some feedback to improve the focus of the project.	
5. Transferable Skills for Life and Professional Practice (10 marks for participation.)	
T1: + Good structure and clear presentation. T2: + Task answer is clearly documented and structured. OneNote Research portfolio: Accessible, clearly structured and easy to use. On-time/Late: OT.	20
