

ACMA4009

by Mohammed Ali

Submission date: 08-Jan-2023 09:35PM (UTC+0000)

Submission ID: 194003653

File name: 41915_Mohammed_Ali_ACMA4009_471303_1592698994.docx (73.16K)

Word count: 3072

Character count: 17521

LEVEL 4 ASSESSMENT SPECIFICATION

Student name:		Student ID number:	
Programme:	CertHE		
Module:	Applied Analytics		
Module code:	ACMA4009	Contribution to Overall Module Assessment (%):	100%
Lecturer:	Nigel Davies	Internal Verifier:	Dr Nitheesh Kaliyamurthy
Assignment Title:	Applied Analytics Assignment Jan 2023	Word count (or equivalent):	NA
Submission deadline:	7/1/2023	Return date of provisional marks & written feedback:	30/1/2023
Submission method:	All written assessments, where practical and possible, must be submitted via Turnitin unless otherwise instructed by the Lecturer. (Please DO NOT put this assessment specification into Turnitin or it will match many similarities with other students' submissions.) Alternative submission method (if applicable): Late submission of the assessment will result in a late penalty mark. Penalties for late submission: Up to one week late, maximum mark of 40%. Over one week late, 0%. Only the Extenuating Circumstances Panel may approve a change to submission dates.		
Academic honesty / referencing:	Academic honesty is required. In the main body of your submission you must give credit to authors on whose research and ideas your work is based. Append to your submission a reference list that indicates the books, articles, etc. that you have used, cited or quoted in order to complete this assessment.		

**Module Learning Outcomes
(from module syllabus)**

To gain an understanding of applied analytical principles and how they can be used as a tool for the solution of technological problems.

TASK DESCRIPTION

Consider each of the following problems and answer **all** questions.
Total marks (70) which constitutes 100%

1. Write down the base units for the following: [5]
- a) Speed -basic unit equates to the metre per second or metre per second. Distance divided by time.
 - b) Momentum- Based on Newton's work, momentum equals to momentum = mass and velocity MV
 - c) Current -An ampere -AM-PIR
 - d) Displacement Measured or defined along a straight line.
 - e) Energy
- Basic units can be defined as joules.
2. Given Work Done can be expressed mathematically as;

$$\text{Work Done} = \text{Force} \times \text{Distance}$$

Write down the base units of Work Done by a force.

Joules

[2]

3. A body of mass 20kg rests on a rough inclined plane which is at an angle of 60° to the horizontal.
- a) Draw a free body diagram in your answer booklet showing the frictional force, normal reaction and the component of weight that acts down the slope. [3]
 - b) Calculate the magnitude of frictional force. [4]
 - c) State which of the two above forces are equal and give a reason why you can state this without calculation. [2]
 - d) Calculate the magnitude of the normal reaction to the surface. [2]

4. An object of mass 4kg is dropped from rest from a vertical height of 39.2m above horizontal ground. If initially air resistance is ignored find :

(i) The time it takes for the object to reach the ground. [3]

(ii) The velocity of the object as it hits the ground. [2]

(iii) If the object experiences a resistive force of 19.6N, find the actual acceleration of the object. [3]

5. Figure 3 shows a 10m uniform beam of weight 8kN which is at rest. The beam is supported by two pillars. Pillar X is positioned 1.5m from the left hand side of the beam, pillar Y positioned 2.5m from the right hand side of the beam.

a) Copy this diagram on your answer booklet, showing **all** forces. [3]

b) Determine both support forces. [6]

6. Solve the following by **factorising**:

i) $x^2 + 5x + 6 = 0$ -2 and -3

$$1 \times 6$$

$$2 \times 3$$

$1 + 6 = 7$ which doesn't equate to our equation.

$$2 + 3 = 5$$

$$x \times x = x^2$$

$$x \times 3 = 3x$$

$$2 \times x = 2x$$

$$2 \times 3 = 6$$

$x = -2$ OR $x = -3$

[3]

$$\text{ii) } x^2 - 8x + 15 = 0 \quad (x-5) - (3(x-5)) = 0 \quad (x-5) \cdot 0 = 3,5$$

[3]

$$\text{iii) } x^2 + 10x = -25$$

$$(x^2 + 10x) + 25 = -25 + 25$$

$$x^2 + 10x = -25$$

$$x^2 + 10x + 25 = 0$$

$$x^2 + 2x \cdot 5 + 5(2)$$

x

[3]

$$\text{iv) } x^2 - 2x - 15 = 0 \quad x = -1/2 = -0.500$$

Type equation here.

[3]

$$x^2 + 10x + 25 = 0$$

$$\text{v) } 2x^2 - x - 1 = 0$$

$$((x+5)^2) \frac{1}{2} = 0$$

$$(x+5) \cdot 2 \frac{1}{2} = 0$$

$$X + 5 = 0$$

$$(x+5) + (-5) = -5$$

$$X + 5 - 5 = -5$$

$$X + 5 - 5 = -5$$

$$X - 5$$

$$x^2 + 2x \cdot 5 + 5^2 + 0$$

$$(x+5)^2 = 10$$

[3]

7. Solve the following by using the **quadratic formula**:

$$\text{(i) } x^2 - x - 1 = 0 \quad \left\{ x^1 \frac{-(1) + (1) \pm \sqrt{1^2 - 4(-1)}}{2} \right\}$$

[5]

$$\text{(ii) } 10x^2 + 5x - 4 = 0$$

[5]

8. Solve the following equations:

$$\text{(i) } \frac{3x}{2} = \frac{x+5}{3} \quad x=1$$

[5]

$$\text{(ii) } 3x + 4y = 14$$

$$2x + y = 6$$

$$x=3y=2$$

[5]

GUIDANCE FOR STUDENTS IN THE COMPLETION OF TASKS

NOTE: The guidance offered below is linked to the five generic assessment criteria overleaf.

1. Engagement with Literature Skills

Your work must be informed and supported by scholarly material that is *relevant* to and *focused* on the task(s) set. You should provide evidence that you have accessed an appropriate *range* of sources, which may be academic, governmental and industrial; these sources may include academic journal articles, textbooks, current news articles, organisational documents, and websites. You should consider the *credibility* of your sources; academic journals are normally highly credible sources while websites require careful consideration/selection and should be used sparingly. Any sources you use should be current and up-to-date, mostly published within the last five years or so, though seminal/important works in the field may be older. You must provide *evidence* of your research/own reading throughout your work, using a suitable referencing system, including in-text citations in the main body of your work and a reference list at the end of your work.

Guidance specific to this assessment: NA

2. Knowledge and Understanding Skills

At level 4, you should be able to demonstrate knowledge of the underlying concepts and principles associated with your area(s) of study. *Knowledge* relates to the facts, information and skills you have acquired through your learning. You demonstrate your *understanding* by interpreting the meaning of the facts and information (knowledge). This means that you need to select and include in your work the concepts, techniques, models, theories, etc. appropriate to the task(s) set. You should be able to explain the theories, concepts, etc. to show your understanding. Your mark/grade will also depend upon the *extent* to which you demonstrate your knowledge and understanding.

Guidance specific to this assessment:

This assignment is aimed at assessing the skills and knowledge of students in the areas of mathematics and science. Students should answer **all** questions and show workings for each of the questions, this may allow you to be awarded marks even if the final answer is incorrect. Care should be taken to present work clearly and hand-written answers are accepted but please ensure that clear pictures/scans are taken and **all** pictures/scans are pasted into a **single** word document and submitted via the **Turnitin link on moodle**.

3. Cognitive and Intellectual Skills

You should be able to present, evaluate and interpret qualitative and quantitative data, in order to develop lines of argument and make sound judgements in accordance with basic theories and concepts of your subject(s) of study. You should be able to evaluate the appropriateness of different approaches to solving problems related to your area(s) of study and/or work. Your work must contain evidence of logical, analytical thinking. For example, to examine and break information down into parts, make inferences, compile, compare and contrast information. This means not just describing what! But also justifying: Why? How? When? Who? Where? At what cost? You should provide justification for your arguments and judgements using evidence that you have reflected upon the ideas of others within the subject area and that you are able to make sound judgements and arguments using data and concepts. Where relevant, alternative solutions and recommendations may be proposed.

Guidance specific to this assessment: NA

4. Practical Skills

At level 4, you should be able to apply the basic underlying concepts and principles to evaluate and interpret these within the context of your area of study. You should be able to demonstrate how the subject-related

concepts and ideas relate to real world situations and/or a particular context. How do they work in practice? You will deploy models, methods, techniques, and/or theories, in that context, to assess current situations, perhaps to formulate plans or solutions to solve problems, or to create artefacts. This is likely to involve, for instance, the use of real world artefacts, examples and cases, the application of a model within an organisation and/or benchmarking one theory or organisation against others based on stated criteria.

Guidance specific to this assessment: NA

5. Transferable Skills for Life and Professional Practice

Your work must provide evidence of the qualities and transferable skills necessary for employment requiring the exercise of some personal responsibility. This includes demonstrating: that you can communicate the results of your study/work accurately and reliably, and with structured and coherent arguments; that you can initiate and complete tasks and procedures, whether individually and/or collaboratively; fluency of expression; clarity and effectiveness in presentation and organisation. Work should be coherent and well-structured in presentation and organisation.

Guidance specific to this assessment: NA

STUDENT FEEDBACK FORM

This section details the *extent* to which the assessment criteria are demonstrated by you, which in turn determines your mark. The marks available for each category of skill are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Generic Assessment Criteria	Marks available/ %	Marks awarded
1. Engagement with Literature Skills		
	0	
2. Knowledge and Understanding Skills

GENERIC ASSESSMENT CRITERIA

Level 4

In accordance with the Framework for Higher Education Qualifications, at the end of Level 4 students will be expected to have demonstrated knowledge of the basic underlying concepts and principles of a subject, and an ability to evaluate and interpret these within the context of that area of study. They should be able to present, evaluate and interpret qualitative and quantitative data in order to develop lines of argument and make sound judgements in accordance with basic theories and concepts of their subject(s) of study. They will have learned how to evaluate different approaches to solving problems, and will be able to communicate the results of their study/work accurately and reliably, and with structured and coherent arguments. They will be able to undertake further training and develop new skills within a structured and managed environment and will have the qualities and transferable skills necessary for employment requiring the exercise of some personal responsibility.

Level 4	Category	FAIL	MARGINAL FAIL	SATISFACTORY (3 rd / Pass)	GOOD (2.2 / Pass)	VERY GOOD (2.1 / Merit)	EXCELLENT (1 st / Distinction)	EXCEPTIONAL (1 st / Distinction)
Engagement with literature (including reading, referencing, academic conventions and academic honesty)		0-29% Little or no evidence of reading and/or reliance on inappropriate sources. Views and findings mostly unsupported and non-authoritative. Referencing conventions used incoherently or largely absent.	30-39% Poor engagement with essential reading. No evidence of wider reading. Reliance on inappropriate sources, and/or indiscriminate use of sources. Heavily reliant on information gained through class contact. Inconsistent and weak use of referencing.	40-49% Engagement with a limited range of mostly relevant and credible sources but with some reliance on information gained through class contact. Some omissions and minor errors. Referencing conventions evident though not always applied accurately or consistently.	50-59% Engagement with an appropriate range of literature, including sources retrieved independently. Some over-reliance on texts rather than other sources. Referencing may show minor inaccuracies or inconsistencies.	60-69% Engagement with a wide range of literature, including sources retrieved independently. Selection of relevant and credible sources. Generally sound referencing, with no/very few inaccuracies or inconsistencies.	70-84% Engagement with an extensive range of relevant and credible literature. Consistently accurate application of referencing.	85-100% Exceptional engagement with an extensive range of relevant and credible literature. High-level referencing skills consistently applied.
	Knowledge and understanding (Knowledge of the basic underlying concepts and	Major gaps in knowledge and understanding of the basic underlying concepts and	Gaps in knowledge of the basic underlying concepts and principles, with flawed or	Limited knowledge and understanding of the basic underlying concepts and	Knowledge of the basic underlying concepts and principles is accurate with a	Competent knowledge of the basic underlying concepts and principles. Exhibits very	Excellent knowledge and understanding of the basic underlying concepts and	Exceptional, detailed knowledge and understanding of the basic underlying

Some elements may be missing.	good understanding of the field of study but lacks depth and/or breadth.	good understanding.	principles of the subject.	concepts and principles
	Cognitive and intellectual skills (Evaluate underlying concepts and principles of a subject and interpret qualitative and quantitative data in order to develop lines of argument and make sound judgements.)	Wholly or almost wholly descriptive work. Little or no evaluation of the underlying concepts and principles. Failure to develop arguments, leading to illogical or invalid judgements. Minimal or no use of evidence to back up views.	Largely descriptive work, with superficial evaluation of the underlying concepts and principles. Weak interpretation of data, flawed development of arguments and judgements. Information accepted uncritically, uses generalised statements made with scant evidence and unsubstantiated opinions. Ideas sometimes illogical and contradictory.	Limited attempt at evaluation of the underlying concepts and principles, tending towards description. Can interpret qualitative and quantitative data but with some errors. Some evidence to support emerging arguments and judgements but these may be underdeveloped or with a little inconsistency / mis-interpretation.	Good evaluation of the underlying concepts and principles. Can interpret qualitative and quantitative data, with minor errors. An emerging ability to use evidence to support the argument. Mostly valid logical judgements.	Sound evaluation of the underlying concepts and principles. Can interpret qualitative and quantitative data accurately. Ability to devise arguments using evidence to make mostly appropriate and valid judgements.	Excellent evaluation of the underlying concepts and principles. Can interpret qualitative and quantitative data accurately and with some insight. Excellent ability to devise arguments using evidence and make appropriate and valid judgements.	Exceptional evaluation of the underlying concepts and principles based on evidence. Outstanding interpretation of qualitative and quantitative data. Exceptional ability to devise arguments using evidence and make wholly appropriate and valid judgements.
	Practical skills (Different approaches to solving problems in particular contexts.)	Limited or no use of taught, basic methods, materials, tools and/or techniques. Little or no appreciation of the context of the application.	Rudimentary application of taught, basic methods, materials, tools and/or techniques but without consideration and	An adequate awareness and mostly appropriate application of basic methods, materials, tools and/or techniques.	A good and appropriate application of basic methods, materials, tools and/or techniques. Clear appreciation of	A very good application of a range of basic methods, materials, tools and/or techniques. Very good consideration of the context of	An advanced application of a range of taught, basic methods, materials, tools and/or techniques. GENERAL COMMENTS

Instructor

Q1. Base units 2/5

Momentum is kgm/s

Joule is not a base unit

Displacement's base unit is m:

Q2. 0/2

base unit of force is KG m/s²

Q3. *inclined plane*

0/11 not attempted

Q4 *vertical motion under gravity* 0/8

not attempted

Q5. *Moments and equilibrium* 0/9

Not attempted

Q6. *Solving quadratics by factorising* 7/15 *not all factorised correctly.*

Q7 *Solution of quadratics by formula* 1/10

incorrect formula used

Q8 Simultaneous equations 1/10

No workings shown.

Unfortunately, there is insufficient work covered to pass this module, a resit is required.
