Veggie pasta bowl	£5.50
Soup of the day	£3.90

Drinks

Fresh orange juice	£2.80
Iced coffee	£3.20
Herbal Tea	£2.00

Why I chose my tool

I chose Microsoft PowerPoint as my tool because it is easy to use and has many design features. I watched the guides for the menu and graphics on the Digital Skills module PowerPoint gave me the option to use different design tools such as changing texts, fonts, images and colors to make my document attractive. It was also easy to layout where I wanted each information to go using shapes and textboxes. PowerPoint also made it easy to copy and paste photos from the web to make my work more appealing. Furthermore, PowerPoint can also correct any spelling errors which will ensure there are no grammatical errors.

What information I used

To complete this task, I used the information that was provided in digital skills module and the DS2 scenario.

How I created my artefact

I created my artefact by reading the suggestions in DS2 Scenario £ Fresh Bite Meals. I created a simple digital menu that looks clear and easy to read. I gathered all the information I needed such as prices and what will be on the menu and organized them in the order Breakfast, Lunch, Snacks and drinks as requested. After following the suggestions given, I checked over the items on the menu and prices to ensure everything is correct.

What changes I made

I made a few changes while creating my artefact. I tried different fonts and font sizes to make the Menu stand out. I also changed the images a few times as I wanted the image to match each section in the menu. I came across a few challenges while creating the menu but then I watched the guide on Digital Skills on graphics and menus which helped a lot. Once I got used to using the tools I was happy with my menu.

What feedback I used

I used the feedback from my class tutor; she explained that the work must be structured and well presented. I also got help from my class friends to ensure I was on the right path as I struggled trying to do the menu on Word. A class friend suggested I use PowerPoint as it straightforward and easier to use than word.

Final explanation

My artefact will welcome more customers as they will now have access to the menu digitally. You can access the Fresh Bites Menu on your phone or laptop to view the menu before you visit the restaurant. You will be able to see what Fresh Bites has to offer and choose what you would like to try before visiting. Furthermore, the menu will also now be easy to edit such as change the prices or add new items to the menu.
